Bone Marrow Transplantation

July 6, 2010

To whom it may concern

Patient Name: VISHNU 1 1/12 M
S/O ANAND KUMAR
Diagnosis: MUCOPOLYSACCHARIDOSIS

Vishnu has Hunter syndrome, which is an genetic storage disorder. Stem cell transplantation would be curative for this condition. He has a matched family donor - his father. We will need to do transplant to prevent disease progress before his second birthday.

The cost of the transplantation would be about 10 lakhs The split bill is as follows.

Room rent - BMT room	=	Rs. 200,000
Medications	=	Rs. 200,000
Blood products	=	Rs. 200,000
Investigations	=	Rs. 150,000
Miscellaneous and professional charges	=	Rs. 50,000
Life saving drugs	=	Rs. 200,000

The procedure is best done as early as possible. This is an approximate estimate and may increase in case of a life threatening fungal infection as antifungal agents are expensive. Kindly provide any financial assistance as a cheque to Apollo Speciality Hospital, Vindra 174205

If there are any further queries, please do not hesitate to contact me on 42291294.

Whomsoever it may concern--

Baby Vishnu, S/o Mini & Asoka Kumar, Trivandrum, Kerala, is a 15 months old male child suffering from a grave, debilitating genetic disorder known as Type I Mucopolysaccharidosis -HURLER SYNDROME. This is one among the Lysosomal Storage Disorders caused due to an enzyme deficiency.

Children suffering from this disease have symptoms affecting all parts of the body throughout their life span. Enzyme Replacement Therapy (ERT) followed by Bone marrow transplant is the only treatment available for this condition around the globe. Pre transplant ERT can be made available to this child only if the family is prepared to get BMT done after 2-3 months. The total cost estimate for BMT is Rs 25 Lakhs as quoted by the specialist concerned. Since this is a life saving treatment, any donations in this regard for Baby Vishnu is appreciated. Should you need anymore details, kindly contact us.

Sincerely Yours

To,
THE HON. DIRECTOR
NANASTHE CHARITABLE TRUST
VELLANAD, TUM.

Sir,

Sub : Request to get a kind help for medical treatment.

I belong to a middle class family having two sons. Unfortunately one of my two sons left the world on 24.9.07 because of deadly diseases-MPS-1 which was diagnosed after a medical examination from the Centre for DNA finger printing and Diagnosis Lab Hyderabad. Bone marrow transplantation was the only one method of treatment medically advised for it and will give good result only if it done before 2 yrs old. Any how, I couldn't do it and so my dear son said good-bye to me for ever.

Sir, my pathetic fate is not yet over. As a punishment for something from the All mighty, my second son also affected the severe perilous diseases. The symptoms of the above mentioned MPS. I was found 3 months before and I did the primary treatment according to my financial ability

But now I am in a deplorable condition because, being coolie, I am unable to continue the treatment for my dear son. The alarming expense of Rs.10, 00000 is beyond my humble thought and so I am in the edge of suicide. If there is any possible to get a financial help to do the bone marrow transplantation it will be a boon in my life and so I can recover my son and live with him till my last time.

Considering my helpless and poor condition, I humbly request to sanction a favorable help to treat my son at the earliest.

Now he is 1 ½ years old, I, hereby, earnestly entreat to consider my request as early as possible.

I started a Account in syndicate bank vellanad. My Account Number is 40082200027890
or cheque to Apollo Speciality Hospital, Vishnu 174205.

Along with this request I send the true copies of the treatment papers for convincing the fact.

Yours Faithfully,

Asoka Kumar.v
